

Ashirvad PURE Dimensions

Capacity (Litres)	Diameter (mm)	Height (mm)	Diameter of Manhole (mm), Rim to Rim
500	887	960	400
700	1000	1037	400
1000	1115	1188	400
1500	1282	1334	400
2000	1367	1552	400

*Dimensional tolerance ± 5 mm

FROM THE HOUSE OF ASHIRVAD PIPES

With nano silver technology

We Innovate to Create Value

Ashirvad has always been providing sustainable and innovative solutions for its customers for past two decades.

Water is Life. The dependency of humans on the water is eternal. In this fast-moving world, potable water is getting depleted every day. So effective utilization of water and storing it safely is crucial. Today, we store water mostly in the plastic water tanks, which is available in the market. Some of these tanks are made using recycled plastic, which makes it less durable and not safe for health. To solve these problems Ashirvad brings to you **"ASHIRVAD PURE"** water storage tank.

ASHIRVAD PURE comes with Nano Silver technology, which gives anti-bacterial property to inner layer of tank. It inhibits the growth of bacteria on surface of the tank and hence makes the water safe. ASHIRVAD PURE tank passes the international test standard of *JIS Z 2801 for anti-bacteria. Our tanks have been designed using Finite Element Analysis (FEA) software to impart superior mechanical properties of impact resistance and tensile strength. Extra ribs have been incorporated to add strength to the tank, which reduces bulging of tank when the tank is full and reduces any chance of bursting under pressure. Our tanks are manufactured using Roto mold technology in the state-of-art manufacturing facility and undergoes stringent quality checks.

We believe in serving the society with best products in terms of quality, health and safety. Ashirvad PURE – Extra Pure Extra Strong!

3 Layer water tank available in Colours:

● Yellow ● White ● Black ● Blue

2 Layer water tank available in Colour:

● Black

Available in Sizes:

500, 700, 1000, 1500 & 2000 Litres

*The Tank / colour may vary from original tank
*Japanese industrial standard

Why Ashirvad Water Storage Tank

Anti-bacterial layer with Nano silver technology

Food grade

No heavy metals used

Threaded lid with dual layer

UV Stable

Guaranteed actual storage volume as per capacity

Extra ribs makes the tank strong & durable

Ensures peace of mind

The science behind

The triple layer polymer construction of Ashirvad tanks has high ESCR (Environmental Stress Crack Resistance) - common cause of stress failure due to environmental interaction.

3 Layer Water Tank

Outer Layer

UV Stable -
Makes the tank long lasting

Middle Layer

Imparts additional strength and restricts entry of harmful UV rays

Inner Layer

Anti-Bacterial -
Ensures safety and hygiene
