viral

Anti-
bacterial

Anti-
fungal

Anti-
algae

*T&C Apply, for cold water plumbing.

The healthiest pipe of India

In a rapidly growing country like India, we don't just require a safe water supply pipe, but the safest and most reliable one. The market is flooded with pipes that are not free from toxins. After a certain number of years, the growth of algae, spores, and fungus becomes evident, leading to the possibility of supplying contaminated water to our homes. This can be improved...

To address this issue, Ashirvad by Aliaxis, the pioneers of the Indian Plumbing Industry, have introduced "**The All New Aqualife+**" for cold water applications. Ashirvad Aqualife+ is India's first anti-microbial, anti-bacterial, anti-viral, anti-algae, and anti-fungal uPVC pipe.

The Need of the Hour: Anti-Microbial Pipe

The growth of algae in pipes occurs due to various reasons, including nutrients in the water, pipe exposure to sunlight, limited airflow, and warmer temperatures. Algae formation can endanger drinking water by producing toxins, which, when consumed, can lead to illness and severe health problems.

The anti-microbial properties in Ashirvad Aqualife+ prevents the growth of algae, ensuring pipe free from spores, fungus, algae, and more, thereby guaranteeing 100% safe water.

Ashirvad Aqualife+ – Your Home's Healthiest Pipe

1. India's First Anti-Microbial uPVC Pipe

Ashirvad Aqualife+ is meticulously designed to prevent the formation of algae, spores, and fungus within the pipe.

2. Lead Free

Ashirvad Aqualife+ uPVC pipes and fittings are crafted from a special lead-free compound, adhering to the latest requirements in developed nations. The lead-free compound is non-toxic and safe for drinking water purposes.

3. Self-Alignment System

To ensure accurate alignment of fittings with pipes during installation, the fittings feature an alignment mark to be matched with the blue stripe on the pipe. This guarantees that concealed installations have water outlet fittings perpendicular to the wall surface, avoiding the need for repairs or breakage after wall finishing.

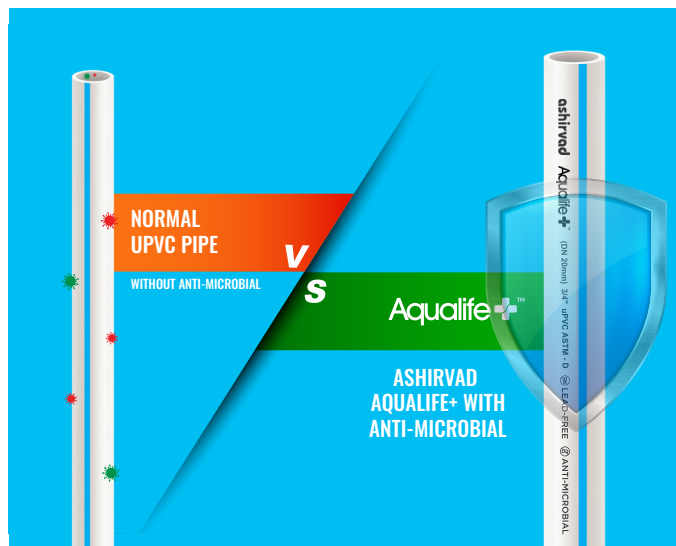

4. Fire Resistant

Ashirvad Aqualife+ pipes and fittings are self-extinguishing and do not support combustion.

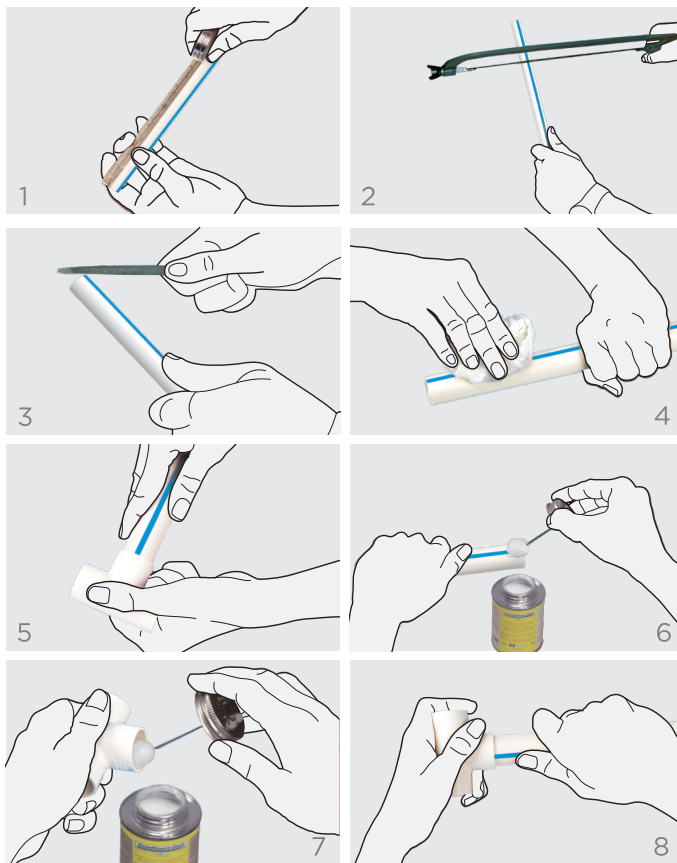

What are you waiting for? Get your healthiest pipe today!

Class of Pipe/Fitting	Standard	Sizes Available
SCH 40 Pipe	ASTM D 1785	1/2" – 6"
SCH 80 Pipe	ASTM D 1785	1/2" – 4"
